

BIONAUTICA TRAILS

EFFICIENT
Bionautica Trails works with any existing treadmill. Patients wear a smart watch during the experience to capture movement information and drive the experience

ECONOMICAL
Low-cost leases and purchase options make it easy to improve patient engagement and satisfaction while bringing cutting edge virtual reality experiences to your practice

EFFECTIVE
"Every time I walk through the therapy gym, Bionautica Trails is in use. Our patients are more engaged for longer periods of time on the treadmill."

- Therapy Manager, Magee Riverfront

"I really like it. I would love to have travel sites, like the Golden Gate Bridge."

- LPN, Jefferson Hospital Magee Riverfront

PATIENT FEEDBACK

The walking trails made the walking experience enjoyable and the delivery of the education pieces made remembering much easier. It helped with my understanding of my cardiac situation and the steps to help myself.

Overall I enjoyed the educational part of the treadmill. It taught me a lot about my medicines and there were a few nutritional facts that I learned to employ daily.

I thought they were great. I missed them when I was on a regular treadmill. I wish there was more. More trails, more information, but it was great!

Note: survey based on 19 cardiac rehabilitation patients actively enrolled in Bionautica Trails group

Plas.md is dedicated to improving human performance and resilience through the integration of real-time biometric data with advanced immersive simulations. Plas.md was Founded and is staffed by a team with over 40 years of combined experience delivering cutting edge behavior change, education and training systems to DoD, government and commercial entities.
